

SPED 510: Outline for A2

For the following assignment, you may choose to complete an IEP, or you can choose to write a paper that will include the following information:

1. Student Information Matrix (including assessments, scores, and background information for individual student.)
2. Interpretation of the matrix. What do the scores mean? How would you inform parents about the students abilities?
3. What goals would you propose for the student? (Maximum of 2)
4. Describe the specially designed instruction that would be appropriate to the student (teaching strategies and methods used by teachers to instruct students).
5. Describe any related services that would be appropriate to the student (audiology, counseling services, early identification, family training-counseling and home visits, health services, medical services, nursing services, nutrition services, occupational therapy, orientation and mobility services, parent counseling and training, physical therapy, psychological services, recreation and therapeutic recreation, rehabilitative counseling services, school health services, service coordination services, social work services in schools, speech pathology and speech-language pathology, transportation and related costs, and assistive technology and services).
6. What accommodations and modifications would be appropriate for the student? Describe why the accommodations and modifications would be appropriate based upon the data from the assessments.
7. How would the student be placed in the regular education setting. What percentage of time would be appropriate? What types of classes would the student have? How should future assessments be given, and the current program be monitored?
8. Look at your A1 topic, and determine how you can discuss in your paper your individual topic. In other words, if your topic was curriculum based measures, you might incorporate a discussion into the Student Information Matrix as to how CBMs were used, or in the section of the paper that discusses future monitoring.

Please make sure your paper is double-spaced 12 pt. font, and you have a cover page. If you use any references, make sure to include a reference page.
